

Janid Eduardo Ham Delgado

Senior Full Stack Developer · Node.js · TypeScript · React · AWS · AI Systems

+52 561 123 8397 · janid.ham20@gmail.com · janidham.com · [GitHub](#) · Mexico City, MX

PROFESSIONAL SUMMARY

Senior Full Stack Developer with 9+ years of experience architecting and shipping scalable, high-performance web and mobile applications. Deep expertise in Node.js, TypeScript, React, and PostgreSQL across startup and enterprise environments. Consistent track record of improving system performance (up to 60%), owning end-to-end product delivery, and working effectively with distributed teams. Experienced deploying production systems on AWS and Google Cloud with modern CI/CD practices. Currently leading AI developer tooling initiatives, designing and optimizing team-wide AI systems (Claude SDD) and automated PR workflows (CodeRabbit) to improve engineering velocity and code quality.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Python, C#
Frontend	React, Vue, React Native, TailwindCSS, SCSS
Backend	Node.js, Laravel, Serverless / AWS Lambda
Databases	PostgreSQL, MySQL, MongoDB, Redis, RethinkDB
Cloud & DevOps	AWS (EC2, Lambda), Google Cloud, Docker, GitHub Actions, CI/CD
AI & Dev Tooling	Claude SDD (instructions, skills, prompts, commands), CodeRabbit, prompt engineering, token/context optimization
Other	REST API Design, Mobile (iOS & Android)

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer · **PeopleCor** | Mar 2022 – Present

Stack: React (TypeScript), Node.js, Laravel, PostgreSQL, Google Cloud, GitHub Actions

- ▶ Own end-to-end development of core web platform features using React (TypeScript) and Node.js/Laravel, collaborating directly with product and design teams.
- ▶ Reduced page load times by up to 60% through targeted frontend optimizations, code splitting, and caching strategies.
- ▶ Designed and optimized PostgreSQL schemas and queries for performance-critical, high-traffic features.
- ▶ Built and maintained CI/CD pipelines with GitHub Actions, cutting deployment time and reducing manual errors.
- ▶ Architected and maintain the team's AI development system using Claude SDD, authoring and iterating on instructions, skills, commands, and prompts optimized for token efficiency and context management, aligned to the project's architecture and coding standards.
- ▶ Implemented CodeRabbit for automated PR reviews, standardizing code quality checks and reducing manual review overhead across the team.

Senior Full Stack Developer · **The Geek Chronicles (Independent)** | 2021 – 2022

Stack: React Native, TypeScript, Node.js, Laravel, AWS EC2, PostgreSQL

- ▶ Designed and shipped a cross-platform mobile app (iOS & Android) using React Native and TypeScript from scratch.
- ▶ Built and deployed RESTful backend services on AWS EC2 with load balancers, handling high-volume traffic reliably.
- ▶ Designed scalable PostgreSQL schemas for content-heavy, high-read workloads.
- ▶ Integrated AI APIs for content generation and data processing pipelines in a production environment.

Senior Full Stack Developer · [FounderWorkshop](#) | Nov 2019 – Mar 2022

Stack: React, TypeScript, Node.js, AWS Lambda (SAM), PostgreSQL, Bitbucket Pipelines

- ▶ Built scalable frontend SPAs using React and TypeScript for multiple B2B products (Lookingglass, AskGenius, Catholic Social Media).
- ▶ Developed serverless REST APIs with Node.js on AWS Lambda, enabling cost-effective scaling without infrastructure overhead.
- ▶ Automated deployment workflows with Bitbucket Pipelines, improving team release cadence.
- ▶ Maintained data integrity and query performance using PostgreSQL across multiple products.

Full Stack Developer · [Amarentas](#) | Sep 2018 – Nov 2019

Stack: React, TypeScript, Node.js, React Native, AWS, Docker, PostgreSQL

- ▶ Led frontend and backend development for a web & mobile product (App Store & Play Store) using React and Node.js.
- ▶ Containerized application stack with Docker on AWS, improving deployment consistency and developer onboarding.
- ▶ Migrated legacy database to PostgreSQL, improving query performance and data reliability.

Full Stack Developer · [Areté](#) | Aug 2016 – Sep 2018

Stack: Angular, Java, AWS, MySQL, PostgreSQL

- ▶ Developed the ARMS (Areté Routing Management System) full-stack, using Angular for frontend and Java for backend services.
- ▶ Deployed and managed applications on AWS; led migration of performance-critical modules from MySQL to PostgreSQL.

Full Stack Developer · [CREE Campeche](#) | Feb 2015 – Aug 2016

Stack: Python, Django, Node.js, MySQL

- ▶ Managed development of the Electronic Case File platform using Python/Django backend and Node.js APIs.
- ▶ Oversaw database design and maintenance in MySQL for a government-facing case management system.

Software Developer · [Right Now](#) | Nov 2015

Stack: Android, iOS, MySQL

- ▶ Developed Masquerade (Android) and Campeche 360 (Android & iOS), both published to Google Play and App Store.

Software Developer · [Sahfer Consultores](#) | Sep 2014 – Nov 2015

Stack: .NET, Desktop & Web

- ▶ Built and maintained custom desktop and web applications using .NET; provided ongoing client support.

EDUCATION

B.S. Software Engineering · Universidad Interamericana para el Desarrollo · 2011–2014

CERTIFICATIONS & TRAINING

React Native · ReactJS · JavaScript & jQuery · Frontend Professional · Git & GitHub · HTML5 & CSS3 · Responsive Design · Accelerating Through Angular 2

Issued by Platzi & Code School

LANGUAGES

Spanish: Native (C2) · **English:** Advanced (C1)
